1 Introduction

Martin Parish Council is a very small parish council with minimal IT equipment as follows:

Council Owned Equipment and Services

One Laptop Computer

A One Drive Account for shared working and cloud backup of council documents

Councillor Own Devices

Councillors will use their own devices to access e-mail and generate or review documentation.

2 Purpose of the IT Policy

The purpose of this IT policy is to establish clear parameters for how councillors and the clerk will use council-provided technology or equipment, and their own devices in the course of their duties.

This policy will:

- Set expectations for appropriate use of equipment and systems;
- Raise awareness of risks associated with IT use;
- Safeguard the council's data and digital assets;
- Clarify what constitutes acceptable and unacceptable use;
- Outline the consequences of policy breaches.

3 Monitoring of IT Use

As an IT provider, the council has the right to monitor the use of its IT equipment and systems, provided there is a legitimate reason for doing so and councillors, employees and other authorised users are informed that such monitoring may take place. Any monitoring must be proportionate and comply with relevant data protection and privacy laws. Other persons may be included if they access or use council systems e.g. if they have a council e-mail address.

4 Scope of this policy

This policy applies to all councillors, staff, and other authorised users, regardless of their working location or pattern, including those who are home-based, office-based, or work on a flexible or part-time basis. It sets out the expectations for the appropriate use of IT equipment and systems provided by the council.

5 Computer use

5.1 Hardware and Equipment

- 5.1.1 This section refers to the single computer and backup drive owned by the council.
- 5.1.2 Council computer equipment is provided for council purposes only.
- 5.1.3 The laptop shall be locked when not in active use to prevent unauthorised access. Failure to comply may lead to disciplinary action.
- 5.1.4 All computer and other electronic equipment supplied should be treated with good care at all times. Computer equipment is expensive, and any damage sustained to any equipment will have a financial impact on the council.
- 5.1.5 Computer and electronic hardware should be kept clean, and every precaution taken to prevent food and drink being dropped or spilled onto it.
- 5.1.6 The laptop and hard drive will carry a number which is logged against the current owner of that equipment. A database of equipment issued will be kept.
- 5.1.7 Equipment should not be dismantled or reassembled without seeking advice.
- 5.1.8 Councillors and staff are not to purchase any computer or mobile equipment (including software). Unless previously authorised.
- 5.1.9 Personal disks, USB stick, CDs, DVDs, data storage devices etc cannot be used on council computers without the prior approval of the chairman. If data storage devices are required to conduct business, they will be provided and numbered.
- 5.1.10 The council laptop must be regularly backed up.
- 5.1.11 The laptop must be stored safely and securely when not in use. Portable equipment (unless locked in a secure cabinet or office) should be always kept with or near the user; should not be left unattended when away from council premises and should never be left in parked vehicles.
- 5.1.12 It is important to ensure the laptop is protected with encryption in case it is lost or stolen. The laptop must be protected with a pin code. Any security set on the laptop must not be dis-enabled or removed.
- 5.1.13 Multi-Factor Authentication (MFA) is a security process that requires users to verify their identity using two or more independent methods—for example, entering a password (something you know) and confirming a code sent to your mobile device (something you have). This significantly reduces the risk of unauthorised access to systems and sensitive data. Where possible the laptop shall be protected with MFA.
- 5.1.14 If the laptop computer or backup drive is lost or damaged this should be reported to the chairman. If the loss or damage is due to an act of negligence, the individual responsible may be liable to meet the first **£100** of the loss/damage.
- 5.1.15 In addition, the council does not permit webcams (which may be pre-installed on many laptops) to be used in the workplace, other than for conference calls for council purposes.

6 Use of own devices

- 6.1 For such a small council it would be unaffordable to have a suite of council provided devices. The Council recognises that councillors and clerk may wish to use their own smartphones, tablets, laptops etc to access e-mail servers, or council One Drive for normal council purposes. Any such use of personal devices will be at the discretion of the council, but consent for standard systems (MS Windows, Mac OS X, Linux - in commercial configurations) will normally be permitted. Such devices should be kept up to date so that any vulnerabilities in the operating system or other software on the device are appropriately patched or updated.
- 6.2 However, the same security precautions apply to personal devices as to the council's desktop equipment. For continuity purposes any emails sent from own devices should be sent from a council email account and should not identify the individual's personal email address.
- 6.3 To protect confidential information, unless it is a requirement of the job and this has been authorised, it is forbidden for photographs or videos to be taken on council premises, without the prior written permission of Martin Council, e.g. "the council." This includes mobile telephones with camera function, camcorder, tape or other recording device for sound or pictures - moving or still.
- 6.4 Under no circumstances should any non-public meeting or conversation be recorded without the permission of those present. This does not affect statutory rights (under The Openness of Local Government Regulations 2014).
- 6.5 Councillors and staff that use council systems are expected to use all devices in an ethical and respectful manner and in accordance with this policy. Council owned devices shall not be used to access inappropriate websites or services transgressions may result in disciplinary action, including summary dismissal (without notice)
- 6.6 The council does not pay for or provide any IT infrastructure that would be used to access online services.
- 6.7 In cases of legal proceedings against the council the council may need to temporarily take possession of a device, whether council-owned or personal to retrieve the relevant data.
- 6.8 Wherever possible the user should maintain a clear separation between the personal data processed on the council's behalf and that processed for their own personal use, for example, by using different apps for council and personal use. If the device supports both work and personal profiles, the work profile must always be used for work-related purposes.

- 6.9 Councillors and staff who intend to use their own devices must ensure that they:
- 6.9.1 use a 6-digit pin, biometric (fingerprint or face recognition) (preferably the latter) to protect their device(s) from being accessed. For smartphones and tablets this should lock the device after 10 failed login attempts.
 - 6.9.2 configure their device(s) to automatically prompt for a password after a period of inactivity of more than 5 minutes.
 - 6.9.3 always password protect any documents containing confidential information that are sent as attachments to an email and notify the password separately (preferably by a means other than email).
 - 6.9.4 ensure secure Wi-Fi networks are used.
 - 6.9.5 ensure that work-related data cannot be viewed or retrieved by family or friends who may use the device.
 - 6.9.6 inform Martin Council, e.g. "the council or the clerk" if their device(s) is/are lost, stolen, or inappropriately accessed where there is risk of access to council data or resources. To prevent phones being used, they will need to retain the details of their IMEI number and the SIM number of the device as their provider will require this to deactivate it.
- 6.10 Personal data relating to councillors, staff, associates, residents, and external stakeholders should not be saved to any personal accounts with third-party storage cloud service providers (e.g. Google Drive, Dropbox etc) as this may breach data protection legislation or create a security risk if the device is lost or stolen. This applies especially if the passwords used to store/access data are saved onto the device, or if the service permits councillors and staff to remain logged in between sessions.
- 6.11 Personal information and sensitive data should never be saved on councillors, staff, or other authorised users own devices as this may breach confidentiality agreements, especially if the device is used by other people from time to time.
- 6.12 If removable media are used to transfer data (e.g. USB drives or CDs), the user must also securely delete the data on the media once the transfer is complete.
- 6.13 Any work done on user's own equipment should be stored securely and password protected and should always be backed up in accordance with the council's standard backup procedures.
- 6.14 Prior to the disposal of any device that has work data stored on it, and in the event of a user leaving the council, councillors and staff may be required to demonstrate to the clerk, e.g. "the IT provider" that all passwords, user access shortcuts and any identifiable data are removed from the device.

7 Health and safety

- 7.1 The council has a duty to ensure that regular appropriate eye tests, carried out by a competent person, are offered to employees using display screen equipment.

8 Password and Authentication Policy

- 8.1 All user accounts must be protected by strong, secure passwords. The council follows the National Cyber Security Centre (NCSC) recommendations for creating passwords using three random words (e.g. PurpleCandleRiver). This method helps create passwords that are both strong and easy to remember, while offering effective protection against common cyber threats such as brute-force attacks. This approach is endorsed in NALC guidance.
- 8.2 In addition to strong passwords, Multi-Factor Authentication (MFA) should be enabled wherever possible. MFA requires users to provide two or more independent forms of verification—for example, a password (something you know) and a code sent to your phone (something you have). This significantly reduces the risk of unauthorised access to systems and personal data.
- 8.3 To further strengthen account security:
- 8.3.1 Initial user account passwords must be generated by the IT provider.
 - 8.3.2 Default passwords provided by vendors or the IT provider must be changed immediately upon installation or setup.
 - 8.3.3 Service or System (e.g. Website) account passwords are generated and managed by the IT provider.
 - 8.3.4 The council recommends these practices as part of its commitment to robust information security and to support compliance with the UK GDPR and the Data Protection Act 2018.
- 8.4 For more guidance, see the NCSC's advice on password security: [NCSC Password Guidance](#)
- 8.5 Access to Passwords
- 8.5.1 Passwords are personal and must not be shared under any circumstances.
 - 8.5.2 Only the assigned user of an account may access or use the associated password.
 - 8.5.3 In exceptional cases (e.g., incident response or employee offboarding), access to system credentials may be granted to authorised personnel from the IT provider with appropriate approvals and logging.
 - 8.5.4 Administrative credentials must be stored securely and only accessible to authorised personnel with a copy provided to the the chair of council, in a sealed envelope, only to be accessed in an emergency.

8.6 Password Storage and Management

8.6.1 Passwords must not be stored in plain text or written down in insecure locations.

8.6.2 Passwords must be stored using a council-approved, encrypted password manager.

8.7 Password Change Requirements

8.7.1 Immediately change password if compromise is suspected

8.8 Password Access Control and Logging

8.8.1 All access to administrative or shared credentials must be logged and auditable.

8.8.2 Attempts to access unauthorized passwords will be treated as a security incident.

8.9 Responsibility

8.9.1 Users are responsible for creating and maintaining secure passwords for their accounts.

9 Monitoring

9.1 The council reserves the right to monitor and maintain logs of the laptop usage and inspect any files stored on the OneDrive, or associated technology to ensure compliance with this policy as well as relevant legislation.

9.2 Monitoring of a councillor or staff email use will be conducted in accordance with an impact assessment that the council has carried out to ensure that monitoring is necessary and proportionate. Monitoring is in the council's legitimate interests and is to ensure that this policy is being complied with.

9.3 The information obtained through monitoring may be shared internally, including with relevant councillors and IT staff if access to the data is necessary for performance of their roles. The information may also be shared with external HR or legal advisers for the purposes of seeking professional advice. Any external advisers will have appropriate data protection policies and protocols in place.

9.4 The information gathered through monitoring will be retained only long enough for any breach of this policy to come to light and for any investigation to be conducted.

9.5 Councillors, staff, and other authorised users have a number of rights in relation to their data, including the right to make a subject access request and the right to have data rectified or erased in some circumstances. You can find further details of these rights and how to exercise them in the council's data protection policy.

9.6 Such monitoring and the retrieval of the content of any messages may be for the purposes of checking whether the use of the system is legitimate, to find lost messages or to retrieve messages lost due to computer failure, to assist in the investigation of wrongful acts, or to comply with any legal obligation.

- 9.7 Any use that the council considers to be 'improper,' either in terms of the content or the amount of time spent on this, may result in disciplinary proceedings.
- 9.8 The laptop computer will be periodically checked and scanned for unauthorised programmes and viruses.

10 Remote working

- 10.1 Increased IT security measures apply to councillors who may be working on a personal device away from a controlled workplace.
- 10.1.1 the location and direction of the screen should be checked to ensure confidential information is out of view. Steps should be taken to avoid messages being read by other people, including other travellers on public transport etc.
- 10.1.2 any data printed should be collected and stored securely.
- 10.1.3 all electronic files should be password protected and the data saved to the council's One Drive when accessible.
- 10.1.4 any data should be kept safely and should only be disposed of securely.
- 10.1.5 papers, files, data sticks/storage, flash drive, or backup hard drives should not be left unattended in cars, except where it is entirely unavoidable for short periods, in which case they must be locked in the boot of the car. If staying away overnight, council data should be taken into the accommodation, care being taken that it will not be interfered with by others or inadvertently destroyed.
- 10.1.6 where possible the ability to remotely wipe any mobile devices that process sensitive information should be retained in the case of loss or theft.

11 Email

- 11.1 Council email facilities are intended to promote effective and speedy communication on work-related matters. Although we encourage the use of email, it can be risky. Councillors and staff need to be careful not to introduce viruses onto council systems and should take proper account of the security advice below.
- 11.2 On occasion, it will be quicker to action an issue by telephone or face to face, rather than via protracted email chains. Emails should not be used as a substitute for face to face or telephone conversations. Councillors, staff, and other authorised users are expected to decide which is the optimum channel of communication to complete their tasks quickly and effectively.
- 11.3 These rules are designed to minimise the legal risks run when using email at work and to guide councillors, staff, and other authorised users as to what may and may not be done. If there is something which is not covered in the policy, councillors, staff, and other authorised users should ask the clerk, rather than assuming they know the right answer.
- 11.4 All councillors, staff, and other authorised users who need to use email as part of their role will normally be given their own council email address and account.

The council may, at any time, withdraw email access, should it feel that this is no longer necessary for the role or that the system is being abused.

- 11.5 Email messages sent on the council's account are for council use only. Personal use is not permitted.

12 Use of the Internet

12.1 Copyright

- 12.1.1 Much of what appears on the Internet is protected by copyright. Any copying without permission, including electronic copying, is illegal and therefore prohibited. The Copyright, Designs and Patents Act 1988 set out the rules. The copyright laws not only apply to documents but also to software. The infringement of the copyright of another person or organisation could lead to legal action being taken against the council and damages being awarded, as well as disciplinary action, including dismissal, being taken against the perpetrator.
- 12.1.2 It is easy to copy electronically, but this does not make it any less an offence. The council's policy is to comply with copyright laws, and not to bend the rules in any way.
- 12.1.3 Councillors, staff, and other authorised users should not assume that because a document or file is on the Internet, it can be freely copied. There is a difference between information in the 'public domain' (which is no longer confidential or secret information but is still copyright protected) and information which is not protected by copyright (such as where the author has been dead for more than 70 years).
- 12.1.4 Usually, a website will contain copyright conditions; these warnings should be read before downloading or copying.
- 12.1.5 Copyright and database right law can be complicated. Councillors, staff, and other authorised users should check with the clerk if unsure about anything.

12.2 Trademarks, links, and data protection

- 12.2.1 The council does not permit the registration of any new domain names or trademarks relating to the council's names or products anywhere in the world, unless authorised to do so. Nor should they add links from any of the council's web pages to any other external sites without checking first with the council.
- 12.2.2 Special rules apply to the processing of personal and sensitive personal data. For further guidance on this, see the council's data protection policy, a copy of which can be found on the council website.

12.3 Accuracy of information

- 12.3.1 One of the main benefits of the internet is the access it gives to large amounts of information, which is often more up to date than traditional sources such as libraries. Be aware that, as the internet is uncontrolled, much of the information may be less accurate than it appears.

13 Use of social media

- 13.1** Social media includes blogs; Wikipedia and other similar sites where text can be posted; multimedia or user generated media sites (YouTube); social networking sites (such as Facebook, LinkedIn, X (formerly known as Twitter), Instagram, TikTok, etc.); virtual worlds (Second Life); text messaging and mobile device communications and more traditional forms of media such as TV and newspapers. Care should be taken when using social media at any time, either using the council laptop or at home on a personal device.
- 13.2** The council recognises the importance of councillors and staff joining in and helping to shape sector conversation and enhancing its image through blogging and interaction in social media. Therefore, where it is relevant to use social networking sites as part of the individual's position, this is acceptable.
- 13.3** However, inappropriate comments and postings can adversely affect the reputation of the council, even if it is not directly referenced. If comments or photographs could reasonably be interpreted as being associated with the council could be regarded as abusive, humiliating, sexual harassment, discriminatory or derogatory, or could constitute bullying or harassment, the council will treat this as a serious disciplinary offence. Councillors and staff should be aware that parishioners or other local organisations may read councillors, staff, and other authorised users' personal weblogs, to acquire information, for example, about their work, internal council business, and employee morale. Therefore, even if the council is not named, care should be taken with any views expressed.
- 13.4** To protect both the council and its interests, everyone is required to comply with the following rules about social media, whether in relation to their council role or personal social networking sites, and irrespective of whether this is during or after working hours:

- 13.4.1 Contacts from any of the council's databases should not be downloaded and connected with on LinkedIn or other social networking sites with electronic address book facilities, unless this has been authorised.
- 13.4.2 Any blog that mentions the council, its current work, councillors, employees, other users associated with the council, partner organisations, local groups, suppliers, parishioners, should identify the author as one of its councillors or employees and state that the views expressed on the blog or website are theirs alone and do not represent the views of the council. Even if the council is not mentioned, care should be taken with any views expressed on social media sites and any views should clearly be stated to be the writer's own (e.g. via a disclaimer statement such as: "The comments and other content on this site are my own and do not represent the positions or opinions of my employer/ the council.") Writers must not claim or give the impression that they are speaking on behalf of the council.
- 13.4.3 Any employee who is developing a site or writing a blog that will mention the council, our current or potential plans, councillors, or staff, must inform the clerk that they are writing this and gain agreement before going 'live'.
- 13.4.4 The council expects councillors, staff, and other authorised users to be respectful about the council and its current or potential staff, councillors and clerks and not to engage in any name calling or any behaviour that will reflect negatively on its reputation. Any unauthorised use of copyright materials, any unfounded or derogatory statements, or any misrepresentation is not viewed favourably and could constitute gross misconduct.
- 13.4.5 Comments posted by councillors, staff, and other authorised users on any sites should be knowledgeable, accurate and professional and should not compromise the council in any way.
- 13.4.6 Any writing about or displaying photos or videos of internal activities that involves current councillors, staff, and other authorised persons, might be considered a breach of data protection and a breach of privacy and confidentiality. Therefore, their permission should be gained prior to uploading any such material. Details of any kind relating to any events, conversations, materials or documents that are meant to be private, confidential or internal to the council should not be posted. This may include manuals; procedures; training documents; non-public financial or operational information; personal information regarding other councillors, staff, and other authorised users anything to do with a disciplinary case, grievance, allegation of bullying/harassment or discrimination, or legal issue; any other secret, confidential, or proprietary information or information that is subject to confidentiality agreements. This does not affect statutory requirements to publish information including under the Freedom of Information Act.

- 13.4.7 Councillors, staff, and other authorised users must be aware that they are personally liable for anything that they write or present online (including on an online forum or blog, post, feed or website). Councillors should always be mindful of the Members Code of Conduct and Nolan Principles. Employees may be subject to disciplinary action for comments, content, or images that are defamatory, embarrassing, pornographic, proprietary, harassing, libellous, or that can create a hostile work environment. They may also be sued by other organisations, and any individual or council that views their comments, content, or images as defamatory, pornographic, proprietary, harassing, libellous or creating a hostile work environment. In addition, other councillors, staff, and other authorised users can raise grievances for alleged bullying and/or harassment.
- 13.4.8 Postings to websites or anywhere on the internet and social media of any kind, or in any press or media of any kind, should not breach copyright or other law or disclose confidential information, defame or make derogatory comments about the council or its councillors and staff, and other authorised users or disclose personal data or information about any individual that could breach data protection legislation.
- 13.4.9 Contacts by the media relating to the council, should be referred to the clerk.
- 13.4.10 During your employment/ involvement with the council, you may create or obtain access to a variety of professional contacts and confidential information. This includes, but is not limited to, contacts made through professional networking platforms such as LinkedIn, where those contacts have been established or maintained in your capacity as a councillor, member of staff, or another authorised user. All such contacts will be considered council property and may be subject to disclosure upon request.
- 13.5** Note that the council may, from time to time, monitor external postings on social media sites. Any employee who has a profile (for example on LinkedIn or Facebook) must not misrepresent themselves or their role with the council. Councillors, staff, and other authorised users are also advised that social media sites are not an appropriate place to air council concerns or complaints: these should be raised with the council or formally through the grievance procedure.
- 13.6** It is important to note that external stakeholders contact details and information remain the property of the council. In addition, councillors, staff, and other authorised users leaving the council will be required to delete all council-related data including external stakeholders contact details from any personal device/equipment.

14 Misuse

- 14.1 Misuse of IT systems and equipment is not in line with the council's standards of conduct and will be taken seriously. Any inappropriate or unauthorised use may lead to formal action, including disciplinary proceedings or, in serious cases, dismissal.
